CELEBRATING THE ANNIVERSARY OF FLORENCE NIGHTINGALE'S 200TH BIRTHDAY

A LIGHT TO HISTORY

“Florence Nightingale’ **Notes on Nursing** (1860) called for frequent handwashing (and your face too, when possible). She noted the importance of hot water and soap. While waiting for a vaccine that works on COVID-19, we could use her ‘outcomes research’ to ascertain what methods, from serious lockdown to physical distancing, get the best results.”

Lynn McDonald CM, PhD, LLD (hon) director, The Collected Works of Florence Nightingale, Toronto.

Visit CNF’s foresight2020.ca to learn more about the critical role nurses are playing TODAY, just like nursing pioneer, Florence Nightingale, a nurse that resonates NOW more than ever!
